

# Reach diverse patients in their own communities

Increasing diversity in clinical trials is more important than ever, yet the path to inclusive research is not always clear. That's where Inato comes in.

By connecting sponsors with proven-diverse, community-based sites, we can make sure the latest medical innovations are safe and effective for **everyone**.

## Clinical trial access for all: a two-pronged approach

In our experience, it's critical to gain a deep understanding of diversity at both the site and trial level.

### SITE DIVERSITY

Diversity & inclusion characteristics, demographics & general practices

### TRIAL DIVERSITY

Ability to recruit & retain patients that will contribute to the study's DE&I goals

## Inato's Diversity Assessment

Sites answer a series of questions covering three facets of diversity with the hope of earning a gold, silver or bronze metal.

90  
gold  
medals

30  
silver  
medals

23  
bronze  
medals

## Constantly improving inclusivity

Inato's team works with sites to grow their diversity capabilities and help them reach and maintain gold-medal status.

### DIVERSITY ASSESSMENT & MEDALS

Identify the most inclusive sites

### RAISE CAPABILITIES ACROSS SITES

Benefit from sites' improving inclusion capabilities

### VERIFY MATCHING & EVIDENCE

Ensure diversity targets can be met for the specific trial

Start connecting with underserved patients today.
