Unlock access to trials in the community

We've created a global clinical trial platform that brings research to patients where they live.

SPONSOR COMMENTS

Enrich trials strategy

Confidently match with the best global sites for your study, at scale.

Reduce site competition

Enlist highly qualified, underutilized sites from Inato's global network.

Access diverse populations

Reach untapped patient pools to increase naive patient enrollment and meet diversity metrics.

Increase site engagement

Drive faster PI response rates while reducing startup costs and timelines.

Go beyond feasibility to reimagine the site-sponsor collaboration model

Solicit Early Interest

Post an early protocol to gauge interest from 2k+ pre-qualified sites while informing protocol design and feasibility analysis.

Open Trial to Applicants

Create a study-specific assessment, open your trial for enrollment plans, and let sites make their case to participate.

Review and Select Sites

Rapidly identify sites that are aligned to your research goals and have the patients, experience, and capabilities your trial needs.

Inato's Verified Commitment

Confidently partner with more sites and their patients. Inato's Verified Commitment, based on site evidence, increases the accuracy and predictability of estimated and actual enrollment numbers and creates the basis for our sponsor contracts.

Reach a broad range of experienced clinical trial sites

Skyrocketing trial costs, increased competition, and growing trial complexity require a reinvention of the partnership model between sponsors and sites. The Inato Marketplace reliably matches sites and trials on a global scale, enabling you to confidently partner with a broader range of sites and expand the pool of patients engaged in your trials.
